

Digital Storytelling

Cruthachadh, Co-obrachadh, Coimhead, Comhradh .-- Spòrsail !!

Planning

Inspirations/Kidspirations

This is an excellent visual learning software which allows you to create a picture of your ideas and organise your thoughts.

Creating

- iPhoto

Take photographs of the children's art work and create a slide show.

They could then write the script and print it out as a book.

- I Can Animate(Mac)

Stop Motion Pro(PC)

Using characters eg playmobile, the children can create a simple plot. The children could add sound tracks and write scripts.

- Comic Life(Mac)

MyComicBookCreator(PC)

The children can add speech or thought bubbles eg to photographs of the scenes from drama lesson, or photographs of pictures they have drawn.

This has been useful when adding conversations to a story.

- Powerpoint

Pictures from iPhoto and Comiclif can be sent to Powerpoint and speech added.

iMovie

Video a group miming scenes from a familiar story. Tell/record a sound track to narrate each scene. Write a script for each scene.

- Audacity Free Download

Easy to use software for editing audio tracks.

- Scratch Freedownload

Allows you to create your own animation

- Wiki -pbworks
